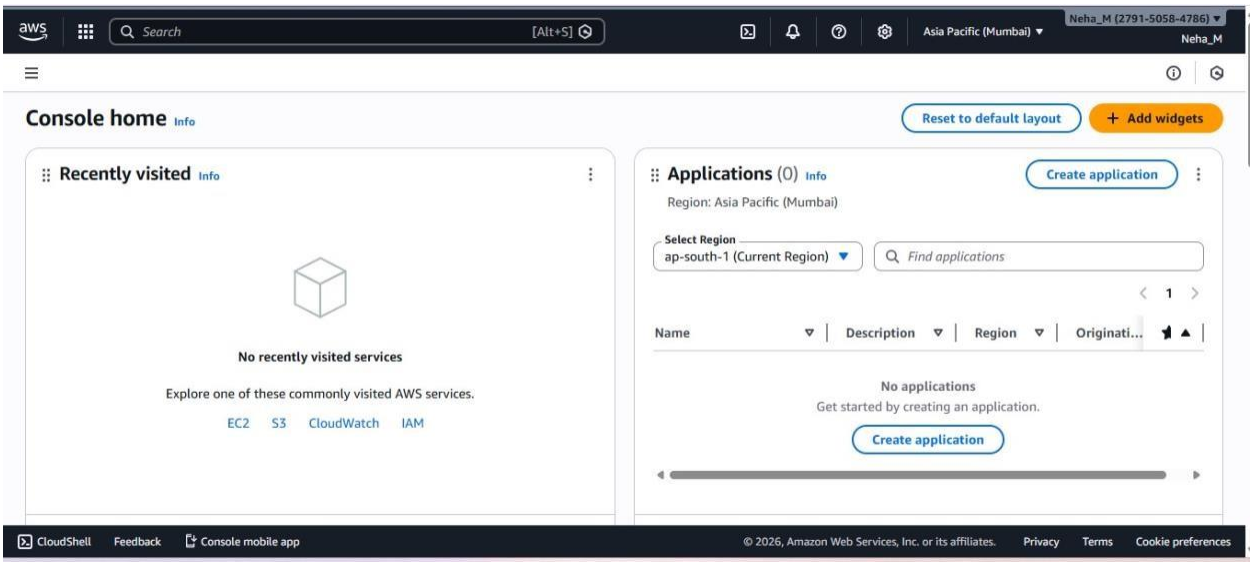
CLOUD COMPUTING

Practical no 6 : AWS IAM

Aim:Implementing Cloud Security using AWS IAM (Identity and Access Management)

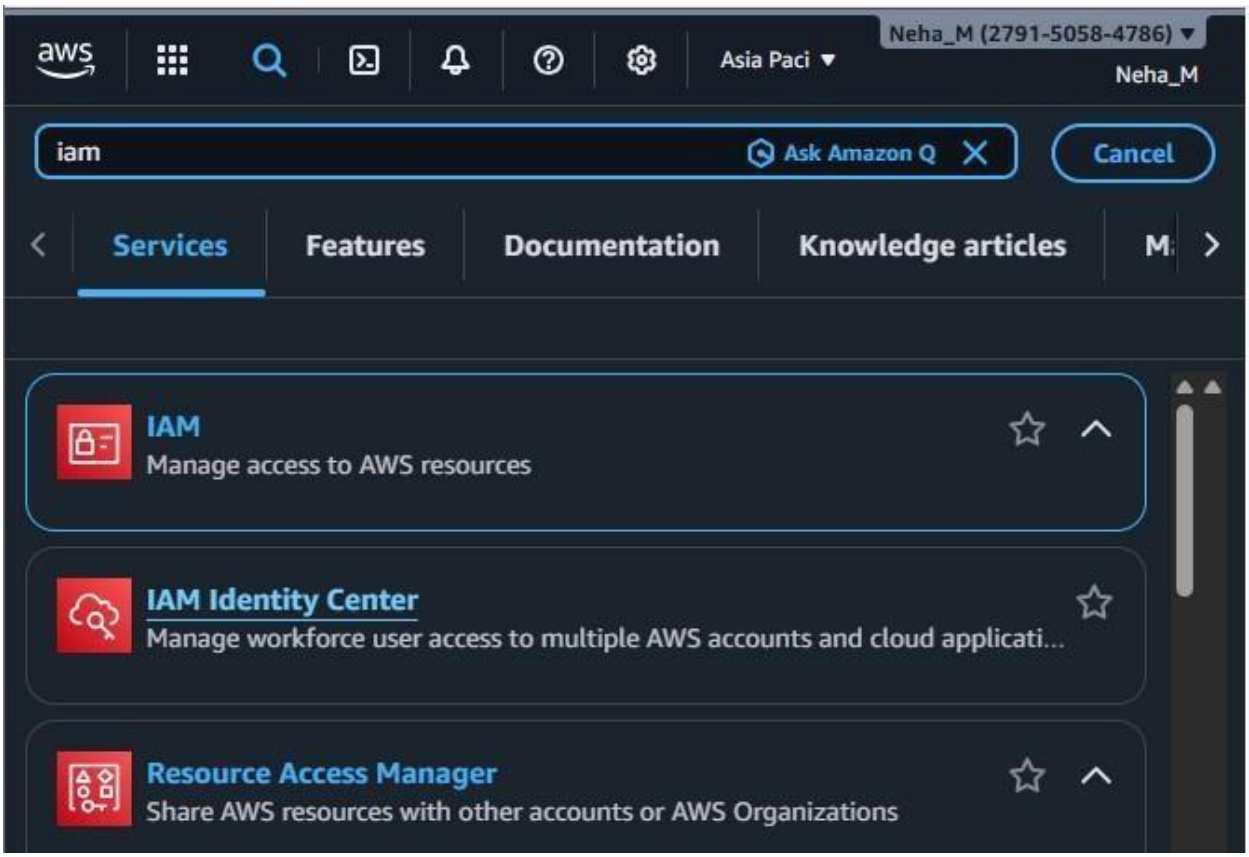
Step 1: Login to AWS Console

Go to https://aws.amazon.com and login to AWS Management Console.
Select region **Asia Pacific (Mumbai – ap-south-1)**.



Step 2: Open IAM Service

From Services menu, select **IAM (Identity and Access Management)**.

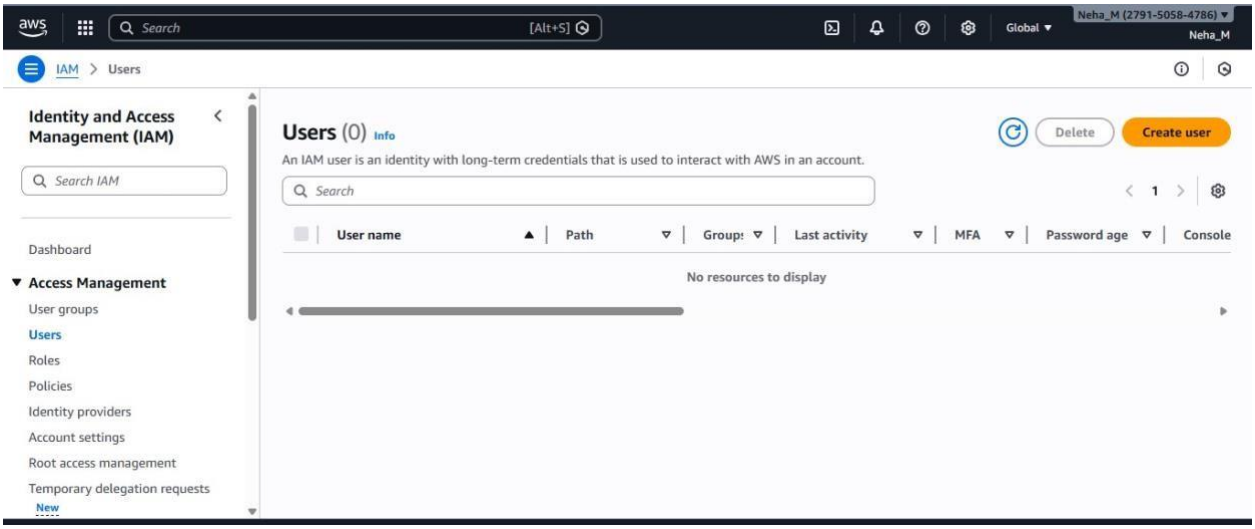


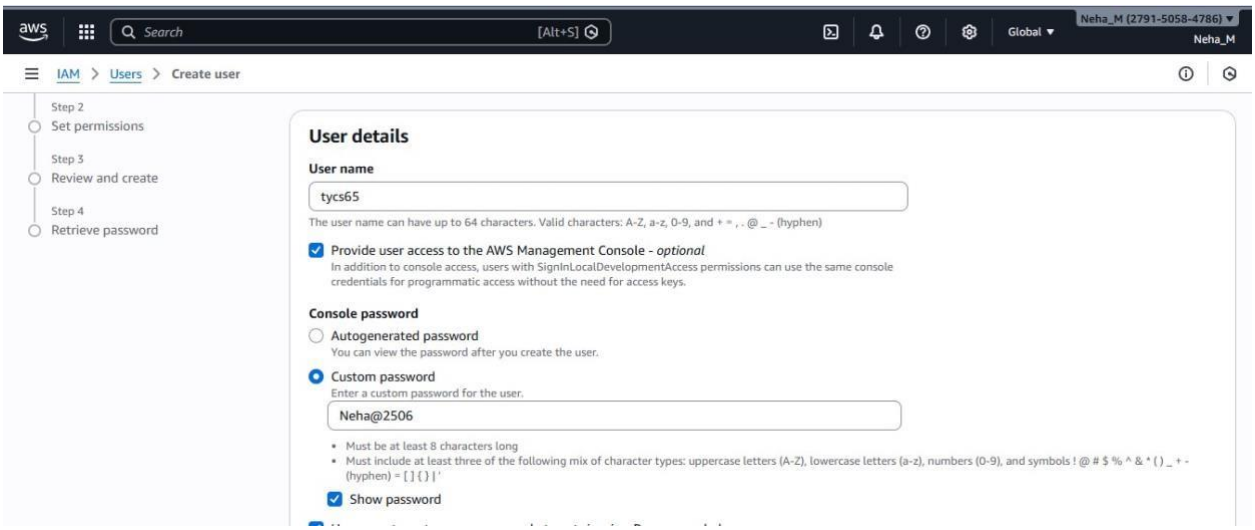
Step 3: Create IAM User

Click on **Users** → **Add users**.

Enter user name as tycs65.

Select **AWS Management Console access** and set a custom password.



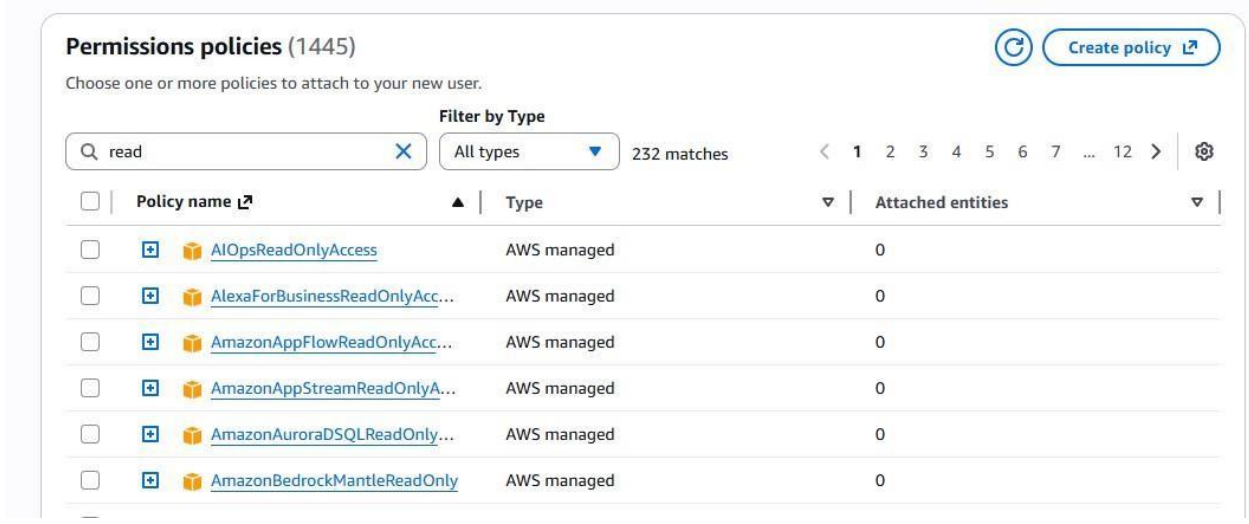


Step 4: Assign Permissions

Select **Attach policies directly**.

Choose policy **AmazonS3ReadOnlyAccess**.

Click **Next** and create the user.



Permissions policies (1445)
Create policy
Choose one or more policies to attach to your new user.

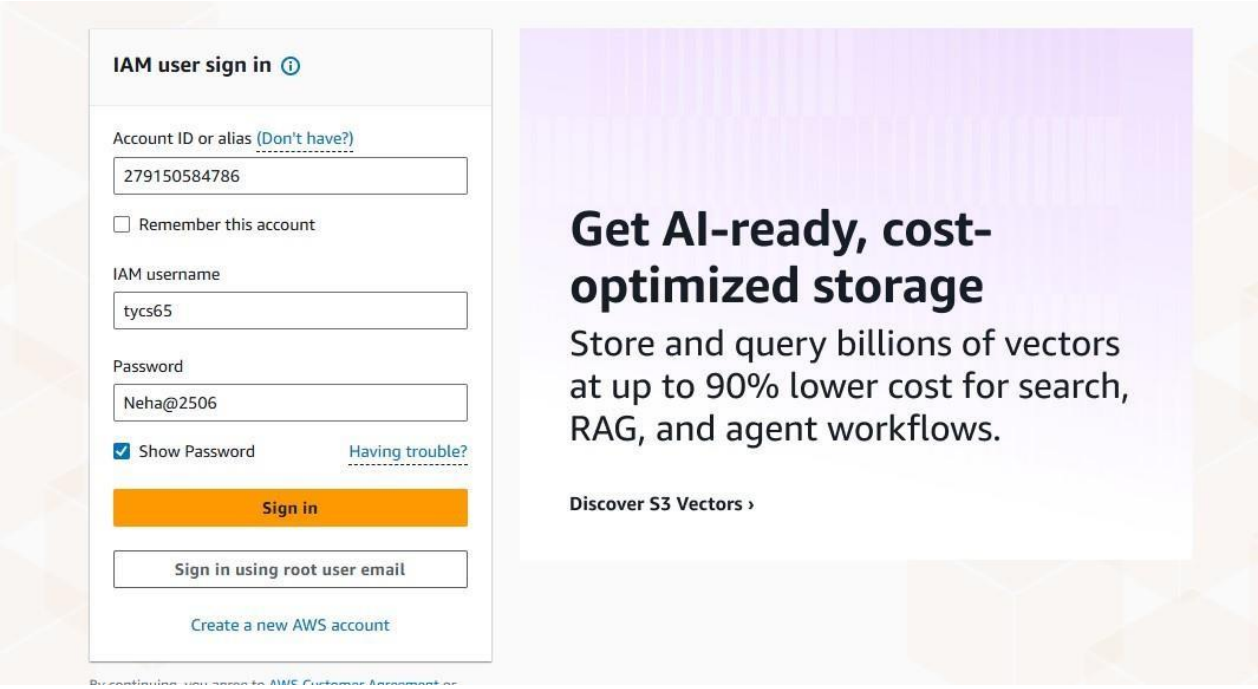
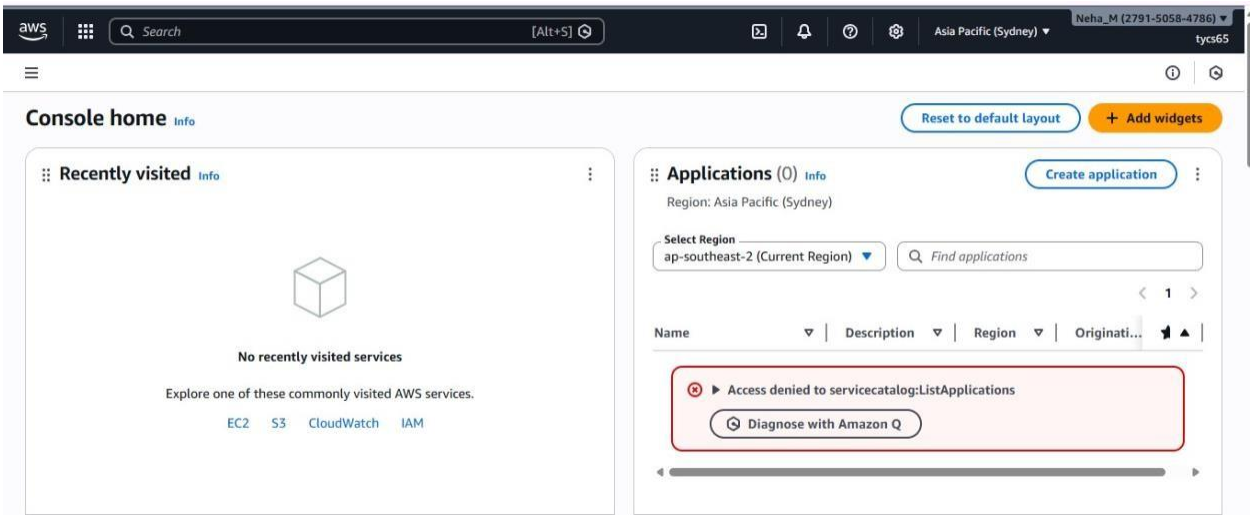
Step 5: Login Using IAM User

Sign out from root account.

Login again using the **IAM user credentials**



Step 6: Verify Access Control

Open **Amazon S3** service using IAM user account.


Verify that the user has **read-only access** and cannot create or delete buckets.
